2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. With respect to independent claims 1 and 13, prior art fails to disclose method of operating a MALDI (matrix-assisted laser desorption ionization) mass spectrometer, the method comprising the steps of directing a first laser shot onto a MALDI sample so as to generate a single or a plurality of sample spectra, analyzing each of the sample spectrum and generating recorded output signals, if the sample spectrum possesses a predetermined criteria, and determining position of a second laser shot to be directed onto the MALDI sample in response to generation of the recorded output signals.
5. With respect to independent claim 7, prior art further fails to disclose a MALDI mass spectrometer, comprising: a laser source, and a processing unit electrically coupled to the laser source, the processing unit comprising (i) a processor, and (ii) a memory device electrically coupled to the processor, the memory device having stored therein a plurality of instructions which, when executed by the processor, causes the processor to: (a) operate the laser source to direct a first laser shot onto a MALDI sample so as to generate a sample spectrum, (b) analyze the sample spectrum and generate an output signal if the sample spectrum possesses a predetermined criteria,

and (c) determine position of a second laser shot to be directed onto the MALDI sample in response to generation of the output signal.

Claims 2-6, 8-12, and 14-18 are allowed by virtue of their dependencies on independent claims 1, 7 and 13.
